

BASELINE RECORD 02: PRODUCT BASELINE

Document ID: PLN-DOC-06

Project Name: Planify – Temporal Horizon Planning Platform

Date Established: December 24, 2025

Git Tag: BL2

Associated Release: v1.1

Status: Frozen / Verified

1. Description and Purpose

This record defines the Product Baseline for Project Planify. It captures the verified state of the system at completion and marks the transition of audited artifacts from the Controlled Library (QA branch) to the Master Library (`main`). The Product Baseline incorporates the initial Functional Baseline (BL1) together with all corrective and additive changes approved by the Configuration Control Board (CCB).

2. Configuration Items (CIs) in the Product Baseline

The following artifacts constitute the frozen Product Baseline. All items were verified during the Configuration Audit (PCA/FCA).

CI ID	Item Name	Version	Category	Verification
PLN-SRC-01	Firebase Connectivity Module	v1.1	Source Code	Pass
PLN-SRC-02	Authentication & Identity Logic	v1.3	Source Code	Pass
PLN-SRC-03	Temporal Tracker Engines (D/W/M/Y)	v1.5	Source Code	Pass
PLN-SRC-07	Search & Synthesis Logic (CR-001)	v1.1	Source Code	Pass
PLN-SRC-08	Dark Mode Theme Engine (CR-002)	v1.2	Source Code	Pass
PLN-DB-01	Firestore Final JSON Schema	v1.1	Database	Pass
PLN-DOC-03	Master CI Register (Final)	v1.2	Documentation	Pass
PLN-DOC-04	Master Change Log (Full)	v1.1	Documentation	Pass
PLN-DOC-05	Configuration Audit Report	v1.0	Documentation	Pass

3. Change Request (CR) Implementation Status

This baseline confirms the successful integration of the following CCB-approved modifications:

- PLN-CR-001:** Global Search Implementation — Integrated
- PLN-CR-002:** Dark/Light Theme Engine — Integrated

- **PLN-CR-003:** Monthly Horizon Filtering Fix — Integrated

4. Audit Sign-off

The QA Lead (Student 6) executed the PCA and FCA and verified that the "as-built" software matches the "as-documented" configuration.

- **Physical Audit:** 100% compliance with repository structure and CI presence.
- **Functional Audit:** All trackers, search, and persistence features satisfy REQ-01 through REQ-05 and associated CRs.

5. Authorization

By signing below, the Configuration Manager officially freezes the code and documentation listed in this record and authorizes promotion to the Master Library.

Configuration Manager: __ (Student 1)

QA Lead: __ (Student 6)

Date: December 24, 2025

Document Control

- **Prepared by:** Configuration Manager
- **Baseline:** Product (BL2)
- **Version:** 1.0
