

BASELINE RECORD 01: FUNCTIONAL BASELINE

Project Name: Planify

Date Established: December 15, 2025

Git Tag: BL1

Status: Frozen / Approved

1. Description

This record establishes the Functional Baseline for Project Planify. It captures the approved requirements, configuration items (CIs), and management rules that form the foundation for all subsequent development and verification activities. Any deviation from the frozen items documented below requires submission of a formal Change Request (CR) and CCB approval prior to implementation.

2. List of Frozen Configuration Items (CIs)

CI ID	Item Name	Version	Hash / Reference
PLN-DOC-01	SCM Plan (SCMP)	v1.1	[Attached PDF]
PLN-DOC-02	Functional Requirements	v1.0	[Attached PDF]
PLN-DOC-03	Master CI Register	v1.0	[Attached Excel]
PLN-INF-01	GitHub Structure Definition	v1.0	Root Dir Map

3. Environmental Baseline

- **Next.js Framework:** v15.x
- **Node.js Runtime:** v20.x
- **Tailwind Engine:** v4.0

These environment versions define the supported development and build targets for artifacts included in this baseline.

4. Approval and Sign-off

The configuration items listed above have been audited for completeness and are hereby frozen under the Functional Baseline (BL1). Changes to any frozen item must follow the established change control process.
